

Let's go places together.

It's cool to be a CAT.

The combination of Canopy & Trailer. This new hybrid is clearly best in its class. The Superior heavy-duty, waterproof trailers feature a fiberglass canopy that is modern looking and low maintenance by design. Our range of CATs have been created to be both fun and functional, and geared to any work, leisure or lifestyle need and situation.

Take our SportyCAT for example.

Perfect for: Community groups, Schools, Clubs, Sporting codes, Hobbyists... Or anyone else looking for the most cost effective and efficient way to transport equipment, luggage, gear, support systems, food, drinks, tents... with style!

A CAT is purrfect!

Regardless of what you do, it's amazing how much gear you often have that needs to be transported somewhere. Similarly, as you are representing your business/brand/club/school or even lifestyle, it's important that whatever you're towing has to look the part.

Superior CATs are in a class of their own. Our heavy-duty waterproof trailers with a fiberglass moulded canopy are modern looking and low maintenance.

Fiberglass is quite possibly the ideal material to use for shuttles. It has its own structural strength reducing the need for steel ribs and weight. The smooth finish stays clean, and is easily repairable. Moreover, it is completely rust and corrosion proof.

Our trailers are aerodynamic, reducing wear on the towing vehicle. Our range of designs make them both user friendly and can be matched to your brand/business colours. Purrfect!

SUPERIOR
